is a colourless, non-toxic adhesive and conditioning spray that provides instant grip to prevent belt squeal, slippage and **Belt Dressing Spray** wear.

The conditioning properties of Belt Dressing Spray prevent the belt from drying out and cracking to both increase transmission efficiency and extend belt life. Just a thin film of Belt Dressing Spray increases adhesion when belts are in contact with drive pulleys, reducing belt slippage that leads to glazing and over-heating.

Belt Dressing Spray is completely insoluble in water, making it equally effective in damp or wet environments for full audit compliance and peace of mind. [Halal certified](#) NSF H1, ISO 21469 and

*Food grade belt dressing spray to eliminate belt slip and maximise belt life.
