The FOODLUBE Chain Fluid Unilube is a gas operated lubrication system ideal for all types of chain and conveyors within the food, pharmaceutical and other clean industries / environments.

FOODLUBE Chain Fluid is an excellent all round lubricating fluid containing additives to boost performance and improve adhesion. It also offers excellent water wash off resistance and corrosion protection.

The Unilube contains 125ml of grease, this can be set to dispense over a time period of 1-12 months.

The temperature range of the lubricant is -20°C to +150°C, the temperature range of the unilube unit is -20°C to +60°C.

The Unilube can be mounted remotely using up to 1 metre tubing and is IP68 rated.

*Food grade, multi-purpose, chain and conveyor lubricant in an automatic lubricator
