FOODLUBE Hi-Torque is a range of food grade, fully synthetic gear oils that minimise wear, thereby reducing risk of breakdown and significantly extending gear box life. FOODLUBE Hi-Torque is proven to extend oil change intervals to up to 4 years.

, a unique additive package that ensures gear teeth are lubricated [ROCOL Start Up Protection System](#) *FOODLUBE Hi-Torque incorporates the on start-up, even after a prolonged shut-down.

Unlike traditional gear oils where gear teeth are unprotected until enough oil has worked its way around the gear teeth, SUPS technology [Watch our](#) leaves gear teeth coated with oil after shut-down. On start-up, oil instantaneously climbs the gears to provide maximum protection. [video to see SUPS in action!](#)

The SUPS technology also protects against micro pitting which is one of the most common forms of gear teeth failure. [.Halal approval](#) FOODLUBE Hi-Torque is fully compliant with food industry standards, with NSF H1 registration, ISO 21469 certification and

Available in 150, 220, 320 and 460 cSt viscosities to protect all gear box applications within the food industry.

*Food grade gear oil with start up protection system
