

BAKERLUBE CL

High Temperature Chain and Conveyor Lubricant

- Outstanding resistance to oxidation
- Solvent free formulation
- Excellent penetration
- Clean, residue free film
- Suitable for automatic lubricators
- Temperature range 0°C to +280°C
- Low fuming
- NSF H2 Registered

Description

BAKERLUBE CL is a NSF H2 registered, ester based, high temperature, bakery oven chain lubricant with extreme pressure additives. Specifically formulated for the lubrication of bakery oven chains operating at temperatures up to 280°C.

Formulated from a combination of synthetic esters and a special antioxidant package which ensures the highest performance in terms of thermal stability, low evaporation loss and minimal deposit formation.

The low evaporation of BAKERLUBE CL gives extended re-lubrication intervals and is economical in use.

*High Temperature Chain and Conveyor Lubricant
