

FLO-LINE 500

FLO-LINE 500 is a chain lubricant specially designed for BRUCKNER sliding chain systems. It has been developed to give a long wet film life at temperatures up to 250°C.

- Suitable for use on modern chain construction and for high speed operation
- Cleans and penetrates into chain pins
- Keeps oil ways free from contamination
- Demonstrates a low viscosity increase at elevated temperatures
- Provides excellent load carrying and anti-wear properties
- Excellent frictional properties give reduced power consumption on chain drive units
- Exhibits low fuming potential thereby providing a cleaner working environment.
- NSF H2 registered – 143334

Description

FLO-LINE 500 has been developed in conjunction with BRUCKNER to give a long wet film life at temperatures up to 250°C. Due to the inherent high oxidation stability of FLO-LINE 500 there is no viscosity increase at elevated temperatures eliminating the risk of tube blocking on automatic lubricating equipment.

*Specially designed for BRÜCKNER sliding chains and chain pins
