

## GALVA FLASH

- Unique combination of flexibility and hardness-resistant to peeling, flaking and fading
- High performance coating-contains pure zinc, aluminium, synthetic resins and additives
- Excellent long term corrosion protection for ferrous metals
- Durable, hydrophobic film-repels water
- Non-toxic formulation – lead and chromate free
- Temperature range -30°C to 450°C
- Meets the requirements of ISO 3549

#### Description

ROCOL Metal Enriched Paints have a Triple Protection formula, which has been developed by Rocol scientists to exploit the chemical properties of Zinc and an advanced resin system to shield steel from corrosion.

Long term corrosion protection for metal components requiring a permanent, bright, glossy appearance with the lustre of aluminium. Ideal for components that cannot be galvanised using a hot dipping process.

The differences between standard paints and Rocol Metal Enriched Paints are significant. Standard paints create a passive barrier, which when breached will offer no protection against corrosion. Rust will begin to form underneath the paint, quickly removing it from the surface.

\*Triple protection galvanising spray
