

RAPID DEMULSE 220

Food grade, high performance, demulsifying gearbox fluid

- Offers an excellent wide temperature resistance of -5°C to +130°C.
- Has excellent demulsification properties for rapid separation from water.
- High performance oil formulated to maximise lubricant lifetime, even under conditions of high load and elevated temperature.
- Non-toxic, NSF H1 registered oil for use where incidental contact with foodstuffs may occur.
- Clean low odour product.

Description

A non-toxic, ISO VG 220, high performance gearbox lubricant particularly designed for applications where water ingress into the gearbox is inevitable.

Rapidly splits from the water enabling the water to be drained from the gearbox periodically, leaving the oil to continue lubricating.

Extends service life between oil changes as conventional oils emulsify into a creamy, frothy mix.

Ideal for use in food, pharmaceutical and other clean environments where NSF H1 lubricants are required.

*Food grade, high performance, demulsifying gearbox fluid
