Description

Solvent based, 2 pack epoxy resin pigmented with zinc phosphate designed for use as a high performance primer for blast cleaned steel, aluminium and galvanising.

Gives excellent corrosion protection in even the most extreme environments.

Should be applied onto a suitably prepared surface prior to the application of the SAFE STEP® range of floor finishes to promote effective adhesion and corrosion protection between the substrate surface and the floor finish.

*Ideal primer for blast cleaned steel, aluminium and galvanised materials for use with the SAFE STEP range of coatings
