Description

Should be applied onto a suitably prepared surface prior to the application of the SAFE STEP® range of floor finishes to promote effective adhesion between the substrate surface and the floor finish.

Only suitable for use on dry or damp substrates and is not suitable for use on wet or any surface where standing water is visible.

Can be applied onto a suitably prepared concrete surface to prevent dusting and improve the durability, chemical resistance and cleanability.

Can be applied over SAFE STEP® antislip coatings to improve cleanability.

*Ideal for porous surfaces and as a sealer for floors prior to application of SAFE STEP anti-slip coatings
