

SAPPHIRE Aqua-Sil

Highly resistant silicone grease for long term lubrication

- Excellent wide temperature resistance – ranging from -40°C to +200°C and it can protect up to +220°C for short periods.
- Outstanding resistance to chemicals, oils and gases far superior to standard greases.
- Excellent resistance to water, including salt water, ensuring components are protected even in submerged conditions.
- SAPPHIRE Aqua-Sil is approved for use in both hot and cold potable (drinking) water.
- Suitable for use as a rubber lubricant for most rubbers (not suitable for silicone rubber).
- Commonly used for the assembly of rubber seals, tap washers and 'o' rings.
- Ideal lubricant for most types of plastics.
- Extremely long wet life reducing re-lubrication frequencies and in some cases can be used as a lifetime lubricant.
- High dielectric strength making it ideal for use as an electrical filling compound
