

V-cut EP

- Very economical dilutions, up to 35:1
- Contains extreme pressure additives enabling best performance when machining harder materials such as hardened steels or similar tough alloys
- A blend of additives and good lubricity prolongs tool life and enables faster machining rates, providing excellent cost savings on expensive tooling
- Prolonged and predictable sump life

Description

The V-cut range is a synergistic range of cutting fluids, hydraulic oils and a slideway lubricant designed to deliver excellent results.

V-cut is engineered to give maximum value to users whilst never compromising on performance due to its utilisation of the latest additive technology.

The V-cut technology is suitable for a wide range of metal working operations including turning, milling, grinding and drilling etc.

Suitable for ferrous and non-ferrous materials and with smaller pack sizes available V-cut is the ideal complete range for small to medium sized machine shops.

V-cut EP is an extreme pressure cutting fluid, a water mix fluid providing a milky type emulsion. Designed for medium to heavy duty cutting operations / materials.

*Value-Engineered Extreme Pressure (EP) Water-Mix Cutting Fluid
