Description

Zerust®/Excor® Axxanol™ Z-Maxx is an anti-corrosion grease ideal for protecting bare-metal parts and components of machinery and equipment in extreme weather and salt-air conditions. In addition, Z-Maxx can protect parts during operation or long-term storage. Z-Maxx outperforms most petroleum-based corrosion preventive coatings and is easier to apply and remove—saving labor and maintenance costs.

Z-Maxx is a thick NLGI 2 anti-corrosion grease offered as Z-Maxx LV, a lower viscosity NLGI 0 grease. Both types provide exceptional corrosion protection, while the original Z-Maxx is also multipurpose EP lubrication grease for high-temperature range applications. Z-Maxx LV is designed for spreadability and has light lubrication properties.

Z-Maxx has very little odor, and when applied in a thin uniform layer, it creates a translucent film that allows visibility of the metal surface. It is hydrophobic and is compatible with synthetic rubber and plastics. For a sprayable anti-corrosion grease version, see information on [Z-Maxx Spray](#).
